Components & Accessories for the Surface Finishing Industry  
Thermoplastic, PTFE, Rubber and Industrial Hoses

# Undisputable know-how that guarantees first class results

Since its inception in the late seventies in the small town of Gland, a stone's throw from Geneva, the Swiss capital of the watch-making industry, Exitflex SA has grown to become an undisputed market leader in the design, manufacture and marketing of accessories for the surface finishing industry.

Over the years, the company has evolved as a global entity with several subsidiaries in Europe, USA, Asia and Australia.

The Exitflex Group is exceptionally well positioned to provide you, and in turn your customers, with the most comprehensive and highest quality product range for automatic, robotic and manual coating applications.

Our employees are the heart of our organisation; their experience, know-how, commitment, and flexibility are part of the company's DNA. Each one of our employees serve you with professionalism and pride.

Our subsidiaries also offer a complete range of PTFE, Rubber and Thermoplastic hoses for paint spray, Hydraulic, Water Jetting and wider industrial markets. These hoses are manufactured by our parent company, Polyhose India Private Limited.

**EXITFLEX**<sup>®</sup>  
Swiss Technology

**EXITFLEX  
SWISS  
QUALITY**

Exitflex SA have been at the forefront of Airless and Air Assisted Airless spray tip design and manufacture for more than forty years. We use only the best tungsten carbide grades and combine Swiss attention to quality, innovation, and detail with considerable worldwide experience of the finishing market to give you the best results in all applications.

# For each and every application, process tool, equipment or machine... An Exitflex solution

Our product specification sheets will help you select the Exitflex product that exactly corresponds to your application and to your existing equipment. Available to download from our website, [www.exitflex.com](http://www.exitflex.com)

## Airless Flat tips

From standard industrial grade to robotic, superfine and line marking models, Exitflex offers a comprehensive assortment of the finest quality flat tips. They fit all airless spray guns and are widely used in automatic and many manual applications. They can be found applying mastics, buffing compounds, ceramics and a wide variety of coating materials throughout various industries.

Our flagship product, the SF tip, is designed for precision spraying with the ultimate in high quality atomization. SF tips reduce energy consumption and increase painting profitability. The Swiss-engineered design, which incorporates a matched pre-orifice within the assembly, enables users to greatly reduce fluid pressure, this in turn reduces paint wastage. SF tips have helped cut pollution on many large customer production lines, working towards achieving emission reduction targets. Large amounts of paint have been saved and cleaning costs cut. A wide programme of sizes is available.

## Airless Reversible tips

Over the years, Exitflex has designed, manufactured and marketed a broad range of airless reversible tips, ideally suited for all types of applications. Whether you are looking for tips that fit popular guards or opt for Exitflex's unique guard design - the only guard in the market that can be entirely dismantled for in-depth cleaning and maintenance - you will find a tailored solution for your needs.

Our Speedy 5 reversible tip with its patented design, rated at a maximum working pressure (MWP) of 517 Bar, ensures a guaranteed centred spray pattern due to the ball key and cone seal design. If a blockage does occur, the line contact seal guarantees easy turning every time; another unique feature invented by our team of creative and innovative engineers.

## Air Assisted Airless tips

Well-known brands such as Binks®, Graco®, Iwata®, Kremlin® Sata®, Seiwa®, Wagner® and Wiwa® amongst others, offer quality AAA spray guns. Many coating facilities operate with equipment from more than one manufacturer rendering the process of sourcing high quality tungsten carbide spray tips overly complicated.

Exitflex has the solution for all your sourcing issues. We are optimally positioned to offer a broad range of AAA tips in premium standard or superfine pre-atomizer versions that directly fit all popular spray guns. If your preferred spray gun manufacturer doesn't offer the exact type or size of tip you need for a project then our team of specialists are able to design and create a solution for you.

The new TRIA Pro45 is an elegant new way to maximise the performance of your Air Assisted Airless spray gun. Designed to minimise down-time, it complements the Binks® 4400™, Graco® G40™, Kremlin® MVX™ and XCITE™, Optima® 2000™ & 2100™, SATAjet® 3000K™ and Wagner® 4600™ sprayguns. The Pro45 is supplied as a kit comprising of an aircap base, a reversible tip and air and fluid seals. Only available from Exitflex.

## Accessories

Whether you need hose inserts, swivels, Y-blocks, couplings, adaptors, rotary cleaning nozzles or airless spray lances, look no further. Exitflex has engineered the solution for you, either in carbon or stainless steel.

As part of its extended product line, Exitflex high pressure stainless steel swivels are precision engineered devices with innovative seal design.

Their low weight and compact design facilitate spray gun movement, especially in difficult to access areas. A must-have for all professionals.

Exitflex can also offer a range of tungsten carbide inserts in four different outer shapes, available in bulk supply. Submit your enquiry for more details.

# Always searching for solutions to optimize your finishing performance

Whether you are looking for airless or air assisted spray tips, you will find what you need in our wide range of standard products. And if not, Exitflex will listen to you and accompany you in designing a bespoke solution according to your own specification. In some cases and depending on your request, private branding could be applied.

Some customers request special adaptations to their machines and customized nozzles for their automatic and manual spraying systems. Operating in different industries (automobile, naval, ceramics, aerospace, furniture, leather, construction, etc) these customers have varied expectations depending on the material to be sprayed (Lacquers, mastics, oil and water based paints, block fillers, epoxies, etc) and finish required.

Whatever the industry you operate in, wherever you are located, we have the machinery and the know-how;

the network and the experience to work side by side with you in an efficient, fast and professional way.

The lake Geneva region of Switzerland is known for its first class technology centres, as well as its highly competitive and competent companies specializing in precision mechanics, metallurgy, assembly and product design.

Due to its ideal location on the shore of lake Geneva, Exitflex has easy and privileged access to top Universities, Engineering schools and technical laboratories in Geneva and Lausanne. A large number of specialized firms around our area complete our strong and dedicated network.

## The science of fluid mechanics and metallurgy

Exitflex have been cooperating with research laboratories in Geneva and Lausanne for several years. Different studies are being carried out in the field of fluid mechanics and metallurgy to better understand certain phenomena, thus ensuring optimum design and construction of Tungsten carbide spray nozzles. Submit your request, Exitflex will help you reach your goals

We believe that our products are key in achieving results that exceed your expectations

**O**ur customers are our ambassadors. Together, their industry experience and our product performance speak volumes about our reputation. Across the world, in Europe, USA, Middle East and Asia, Exitflex products are used by customers in all industries and are known for their quality, precision and innovative designs.

“Our factory runs 24/7, we cannot afford extended down-time with our spraying machines. By choosing the Exitflex robotic flat tips we know what to expect from the outset. There are no nasty surprises; **we know precisely when to replace worn tips to obtain optimum results, and improved productivity**”, says a Brazilian customer.

“**We win at all levels**”, says a Swedish customer. Using Exitflex SF flat tips guarantee an exceptional spray quality and pattern while at the same time drastically cutting spare part costs and maintenance expenses compared to more complex air assisted systems.”

“The Z swivel from Exitflex has no equal in the market. This stainless steel product is compact, light and can withstand the toughest working conditions. **These characteristics provide us an ease of use and prevent injuries for our workers**”, says a an Indian MCM paint shop foreman.

“Swiss precision and quality ensure that our jobs are completed on time, every time. **The LM tips from Exitflex save us a lot of money in the long run**”, says an Italian customer.

**Performance Quality and Supply Reliability, this is the experience of a Japanese company** needing Exitflex airless spray tips for their business and who have been buying them for nearly 20 years.

“**Switching from air mix to robotic airless SF tips from Exitflex**, resulted in top coat quality, suppressing the need of compressed air and reducing overspray”, says a large window manufacturer in Norway.
